

USING CADASTRAL TO FIND YOUR GEOCODE FOR THE MONTANA PROPERTY TAX REBATE

In this step-by-step tutorial we're going to show you how to find your geocode and file your rebate claim as quickly as possible.

A **geocode** is a 17-digit code that identifies your home. By law, you must include your principal residence's geocode on your property tax rebate claim. Without a geocode, we can't identify your principal residence and won't be able to process your claim.

Your geocode is available on Montana Cadastral. Cadastral is a database maintained by the Montana State Library. It allows the public to view information about public and private land ownership in Montana, including your geocode.

So let's get started!

1

Navigate to cadastral.mt.gov

2

Click "SEARCH". This will bring up the Search bar. You're going to search By Owner, using your County and your Name.

3

Select your county from the drop down menu.

YELLOWSTONE

Owner Name:

Smith

SEARCH

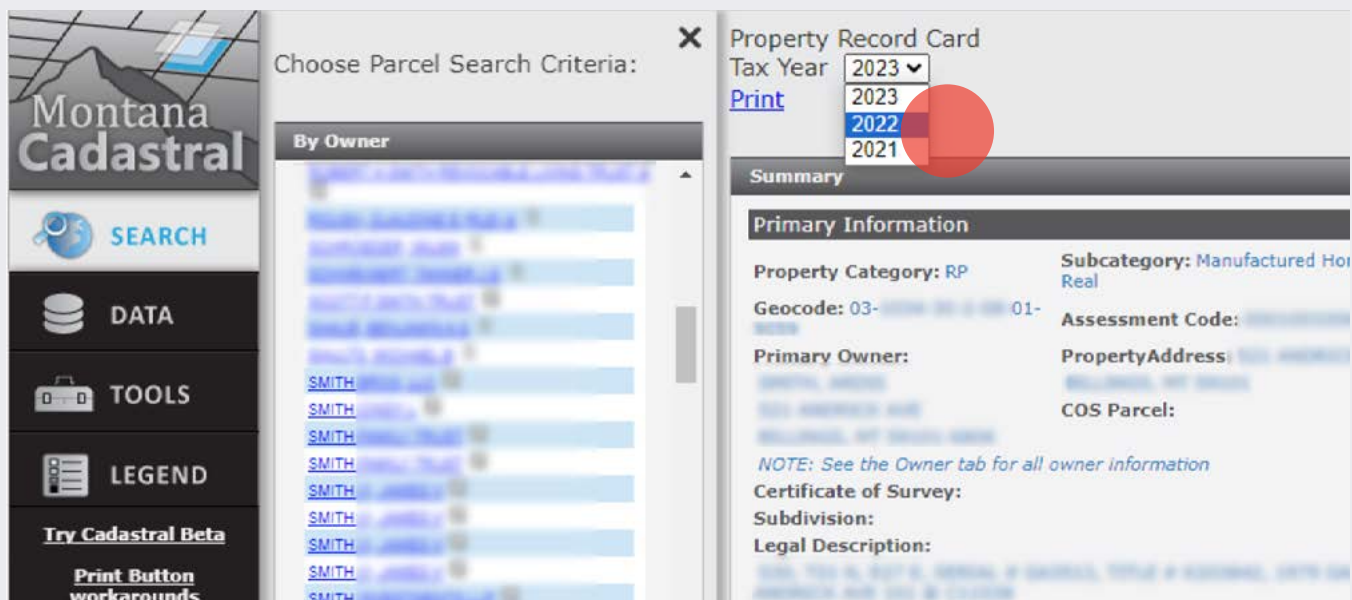

5

Select your name from the search results.

6

This will pull up your Property Record Card. Use the drop down menu to select "2022" as your tax year.

7

Your geocode for your principal residence is a 17-digit code and can be found under the Primary Information section.

You can copy and paste your geocode onto your property tax rebate form if filing online. If you're filing a paper form, enter the geocode exactly as it appears on your Property Record Card.
